

Artificial Intelligence (AI) Policy

Version 1

Policy confirmed by the Governing Body of Grace Mary Primary School on:

Date: 3rd December 2025

Signature:

(Chair of Governors)

Signature:

(Head Teacher)

Contents:

Page 3	Statement of intent

Page 9	Monitoring and review

Artificial Intelligence (AI) is a powerful technology that is already transforming the way we work. Delivering efficiencies, improving effectiveness and empowering decision making. AI also poses significant challenges with ethical, legal and social implications. AI can make mistakes, introduce bias, misinterpret with potentially damaging consequences if left unchecked or used inappropriately. Therefore, we need to establish a clear and robust policy for the use of AI so that exploit its opportunities while avoiding its pitfalls.

AI must be legal and respectful. We do not permit the use of AI that contradicts or undermines our core values.

This Policy sets out the essential principles and ground rules for the use of AI at Grace Mary Primary School. We must keep our information safe and ensure we stay true to our core educational ethos as the use of AI develops.

Statement of intent

At Grace Mary Primary School we recognise that the use of artificial intelligence (AI) can help to positively affect teacher workload, develop pupils' intellectual capabilities and prepare them for how emerging technologies will change workplaces. While there are many benefits to the use of AI tools, the content they produce may not always be accurate, safe or appropriate, and could lead to malpractice.

Through the measures outlined in this policy, the school aims to ensure that AI is used effectively, safely and appropriately to deliver excellent education that prepares our pupils to contribute to society and the future workplace.

For the purposes of this policy, the following terms are defined as:

- AI – The theory and development of computer systems able to perform tasks normally requiring human intelligence, e.g. visual perception, speech recognition, decision-making.
- Generative AI – A category of AI algorithms that generate new outputs based on the data they have been trained on.
- Misuse of AI – Any use of AI which means that pupils have not independently demonstrated their own attainment.

Legal framework

This policy has due regard to all relevant legislation and statutory guidance including, but not limited to, the following:

- Data Protection Act 2018
- The UK General Data Protection Regulation (UK GDPR)
- DfE (2025) 'Keeping children safe in education 2025'
- DfE (2025) 'Generative artificial intelligence (AI) in education'
- DfE (2025) 'Meeting digital and technology standards in schools and colleges'

This policy operates in conjunction with the following school policies:

- Online Safety Policy
- Cyber-security Policy
- Cyber Response and Recovery Plan
- Data Protection Policy
- Child Protection and Safeguarding Policy
- Acceptable Use Agreement for Pupils and Staff

Roles and Responsibilities

The governing board will be responsible for:

- Ensuring that this policy is effective and complies with relevant laws and statutory guidance.
- Reviewing this policy on an annual basis.
- Ensuring their own knowledge of the use of AI tools in the school is up-to-date.
- Ensuring all staff undergo child protection and safeguarding training, including online safety, at induction and at regular intervals.
- Ensuring the school follows the DfE's digital & technology standards.

The headteacher will be responsible for:

- Ensuring that staff receive regular, up-to-date training on how to use AI tools in school.
- Ensuring that the use of AI tools in the school is integrated into relevant policies and procedures, the curriculum and staff training.
- Communicating with parents to ensure they are kept up-to-date with how AI tools are being used in the school, how this will impact pupils' education and how the school is ensuring the tools are being used safely and effectively.
- Working with the governing board to review and update this policy.
- Ensuring that AI practices are audited and evaluated on a regular basis.

ICT technicians will be responsible for:

- Providing technical support in the development and implementation of the school's AI practices, policies and procedures.
- Implementing appropriate security measures.

- Ensuring that the use of AI tools is taken into consideration when creating policies and procedures regarding online safety, child protection and safeguarding, and data protection.

The DPO will be responsible for:

- Keeping up-to-date and informed with AI technologies. relevant to the school.
- Understanding and maintaining awareness of what the use of AI means for data protection in the school.
- Advising the school on how to integrate the use of AI while complying with data protection regulations.

The DSL will be responsible for:

- Taking the lead responsibility for online safety in school.
- Undertaking training so they understand the risks associated with using AI tools in school.
- Liaising with relevant members of staff on online safety matters.
- Maintaining records of reported online safety concerns relating to the use of AI tools, as well as the actions taken in response to concerns.
- Reporting to the governing board about the use of AI tools on a regular basis and how it links to safeguarding.

All staff members will be responsible for:

- Adhering to the Acceptable Use Agreement and other relevant policies.
- Taking responsibility for the security of the AI tools and data they use or have access to.
- Modelling good online behaviours when using AI tools.
- Maintaining a professional level of conduct in their use of AI tools.
- Having an awareness of the risks that using AI tools in school poses.
- Reporting concerns in line with the school's reporting procedure.
- Where relevant to their role, ensuring that the safe and effective use of AI tools is embedded in their teaching of the curriculum.
- Familiarising themselves with any AI tools used by the school and the risks they pose.

Data protection and cyber-security

The school is aware of the data privacy and cyber-security implications that come with using generative AI tools, and will ensure that all AI tools are used in line with the school's Data Protection Policy and Cyber-security Policy. The school will follow the procedures in these policies to continue to protect pupils from harmful online content that could be produced by AI tools.

The school will use data anonymisation techniques, e.g. by using pseudonyms, to ensure that any pupil data processed through AI tools for administrative purposes is not identifiable.

Data audits will be carried out to ensure that AI tools are not capturing or processing personal data inadvertently.

Only authorised staff members will be permitted to use AI for data-related activities.

All staff will apply their best judgement and common sense to manage cyber-security risks effectively and ensure that the DfE's [cyber standards](#) are followed at all times.

Refer to the DfE's [Filtering and monitoring standards for schools and colleges](#) to ensure that the appropriate systems are in place.

Intellectual property (IP) implications

The school will ensure that all uses of generative AI tools adhere strictly to IP laws and best practices.

The following are some basic rules and etiquette that all staff should adhere to when using AI:

- You own what you publish – no blaming AI. AI is a support tool not your replacement. You are accountable for the content, quality and accuracy of anything that you produce or share using AI. AI is no excuse for mistakes, errors or misconduct.
- You need permission to use AI for certain purposes such as transcribing, recording or analysing meetings, personal or sensitive data. Any information captured by AI is still subject to relevant data protection legislation.
- You must use AI in a transparent, fair and ethical manner. You should disclose the use of AI and its limitations, assumptions and uncertainties to relevant audiences. You should ensure that AI does not discriminate, exclude or harm any individual or group based on their characteristics such as age, gender, ethnicity, race disability or religion.

The school will evaluate the terms of use for each AI tool to ensure compliance with copyright and intellectual property laws. The school will ensure that any use of pupil or teacher-created content is handled with full compliance with copyright laws.

Using AI tools

The school will ensure that AI tools are used appropriately to achieve the following aims:

- To reduce workload
- To free up teachers' time
- To assist with the production of high-quality and compliant administrative plans, policies and documents
- To support the teaching of a knowledge-rich computing curriculum

To teach pupils:

To identify and use appropriate resources to support their education, including age-appropriate resources and preventing over-reliance on a limited number of tools or resources.

Whilst recognising that AI tools can be used appropriately and with benefit to teaching and learning, the school will keep in mind that the content produced by AI tools can be:

- Inaccurate.
- Inappropriate.
- Biased.
- Taken out of context and without permission.
- Out of date or unreliable.

AI tools will not be used for educational resources without appropriate fact-checking and quality assurance measures in place.

Where AI tools are used to produce administrative plans, policies and documents, all staff members will understand that the quality and content of the final document remains the professional responsibility of the staff member who produced it. Staff members using AI tools to create documents will not assume that AI output will be comparable with a human-designed document that has been developed in the specific context of the school.

When using AI tools, staff and pupils will ensure that any content produced is scrutinised and cross-checked for its appropriateness and accuracy.

Staff members will be aware that AI tools return results based on the dataset it has been trained on – it may not have been trained on the national curriculum, and may not provide results that are comparable with a human-designed resource developed in the context of the national curriculum. Staff members will be mindful of this in their teaching and marking of pupils' work.

Pupils and staff members will be reminded that using AI tools cannot replace the judgement and deep subject knowledge of a human expert. Staff members will stress the importance of pupils acquiring their own knowledge, expertise and intellectual capability rather than relying on AI tools in their work.

Misusing AI tools

Preventing misuse

The school acknowledges that misuse of AI tools can happen both accidentally and intentionally, and that education and awareness is key to preventing misuse. The school will consider taking the following actions to prevent the misuse of AI tools:

- Restricting access to online AI tools on school devices and networks

for pupil access

- Investing in educating and training staff, pupils and parents on the use of AI tools and raising awareness of the risks and issues that come with its use

Identifying misuse

Staff members will continue to use the skills and observation techniques already in use to assure themselves that pupils are not misusing AI tools.

Safeguarding

The school acknowledges that generative AI tools can be used to produce content that is dangerous, harmful, and inappropriate. The school will follow the procedures set out in the Child Protection and Safeguarding Policy and the Online Safety Policy to ensure that pupils are not able to access or be exposed to harmful content.

Pupils will be taught about the risks of using AI tools and how to use them safely. Pupils will be made aware of how to report any concerns or incidents involving generative AI, and who to talk to about any issues regarding the use of AI tools.

The school will engage with parents to inform them of the safeguarding risks that come with using AI tools, and how the school is protecting pupils online. The school will ensure that parents are aware of who to speak to about any concerns or issues regarding the use of AI

The school will ensure that the appropriate filtering and monitoring systems are in place to protect pupils online, following the DfE's filtering and monitoring standards.

All staff members will receive training on the safe use of AI as part of their online safety training, which is regularly updated.

Teaching pupils about the safe use of AI

Teaching about the safe and appropriate use of AI will ensure that pupils benefit from a knowledge-rich curriculum which enables them to become well-informed users of technology and understand its impact on society. Pupils will gain strong foundational knowledge which ensures they are developing the right skills to make the best use of AI tools.

The school will:

- Prepare pupils for changing workplaces.
- Teach pupils how to use emerging technologies, including AI tools, safely and appropriately.
- Raise awareness of the limitations, reliability and potential bias of AI tools.
- Help pupils to understand how information on the internet

is organised and ranked.

- Include online safety teaching in the curriculum and how to protect against harmful or misleading content.
- Raise awareness and understanding of protecting intellectual property rights.
- Encourage the safe and responsible use of digital content.
- Teach about the impact of technology, including disruptive and enabling technologies.
- Include teaching about how computers work, connect with each other, follow rules and process data in the curriculum.

Pupils will be supported to identify and use appropriate resources to support their ongoing education through the use of age-appropriate resources, which may include AI tools, whilst preventing over-reliance on a limited number of tools or resources.

Monitoring and review

The governing board and headteacher will review this policy in full on an annual basis, and following any incidents that occur due to the use of AI tools, e.g. data protection or cyber-security.

Any changes made to this policy are communicated to all members of the school community.

We will maintain a list of approved AI solutions as part of this policy and this will be made available to you

Solution	Approved purposes	Date approved /who
Microsoft Copilot	Web searches, letters, reports, administrative tasks	Sept 2025 – agreed by Headteacher & Network IT
